Living that defines you

GOTWOB Design House was established in 2008 with the idea of making good design by architects Begum Celik and Berk Simsek. The unique supplementary furnitures with a modern twist are designed predominantly by creative director Begum Celik. GOTWOB produces home furnishings and contract projects with its innovative approach.

GOTWOB designs have a reflex that can adapt quickly to changing lifestyles and habits, as well as meeting today's needs. Each collection is a series of products that share an origin, but can also live separately from one another and have individual identities.

Gathering Good Design with high quality materials, advanced production techniques and skilled craftsmanship has made GOTWOB products recognized on international platforms and demanded from many countries.

From natural materials such as marble, solid wood, brass- furnitures are individually made and hand crafted in GOTWOB wood and metal ateliers by expertised craftsman.
